P: 206-583-0655 or 1-800-227-0977

E: [waterworkshops@triangleassociates.com](mailto:waterworkshops@triangleassociates.com)

Students examine how wastewater is treated. They learn that some pollutants can't be entirely removed during treatment and that they eventually enter surface water.

**Key lesson messages:**

- How wastewater is treated
- How some pollutants impact the environment
- How actions impact surface water quality

"The hands-on activities and personal involvement with the students lent real-life situations to the presentations." -7<sup>th</sup> grade teacher

The Water Connections workshops work well as a three-day unit combined with 4-1-1- on H<sub>2</sub>O. The workshops help students meet science performance standards by exploring how parts of a system connect and how pollutants impact an ecosystem.
